PROFESSIONAL SUMMARY

Front-end Developer with more than 5 years of professional experience building, evolving and supporting web applications in structured environments and cross-functional teams.

Hands-on experience with React, Vue.js, TypeScript and Micro Frontend architecture, as well as design systems, component documentation, automated testing and API integration.

Quality-oriented professional with strong collaboration and execution skills, experienced in agile practices, code review, technical refinement and continuous product improvement.

PROFESSIONAL EXPERIENCE

Senior Front-end Developer

Zappts | Full-time | Remote | Brazil

November 2025 – Present

Working on the development of an application for a financial institution, focused on scalability, standardization and front-end architecture evolution.

Key Contributions

- Built front-end solutions with React and TypeScript in a Micro Frontend architecture using Module Federation.
- Worked with Style Dictionary and Design System assets to ensure visual consistency and interface scalability.
- Created and documented components in Storybook.
- Implemented tests with Jest, tracked coverage metrics and applied linting practices in the quality workflow.
- Integrated with APIs documented in Swagger.
- Used Docker, Nginx and Git in the development and delivery workflow.

Front-end Developer

Fin-X | Consulting | Remote | Brazil

November 2024 – Present

Providing parallel consulting services to support and evolve a product in the healthcare sector.

Key Contributions

- Maintained and evolved front-end features to ensure product continuity and stability.
- Fixed production bugs through systematic debugging.
- Participated in code reviews and pair programming to improve code quality.
- Collaborated on technical refinement and delivery predictability.
- Developed interfaces using HTML, CSS, JavaScript and Vue.js.
- Worked in an agile environment focused on product support and continuous evolution.

Front-end Developer

VIASOFT | Full-time | Remote | Brazil

November 2024 – November 2025

Worked on Voors, a people management solution, with focus on user experience and operational efficiency.

Key Contributions

- Developed responsive and user-friendly interfaces for the platform.
- Translated UI/UX designs into functional components using React and Tailwind CSS.
- Optimized front-end performance, scalability and cross-browser compatibility.
- Collaborated with multidisciplinary teams in an agile environment.
- Mapped and documented processes while proposing operational improvements.

Frontend Developer

Zappts | Full-time | Sao Jose dos Campos, SP | Brazil

June 2021 – October 2024

Worked on the development of an application focused on integration with Detran, balancing product evolution, code quality and collaboration with multiple stakeholders.

Key Contributions

- Developed front-end solutions with React 18, TypeScript and Emotion Styled.
- Implemented tests with Jest, tracked coverage metrics and applied linting standards.
- Documented components in Storybook and integrated APIs through Swagger-based contracts.
- Actively participated in planning, requirements analysis and technical solution definition.
- Collaborated with design and back-end teams to ensure application functionality and performance.
- Focused on quality, performance and continuous application improvement.

Front-end Developer

Math Analytics | Project | Brasilia, DF | Brazil

March 2021 – September 2021

Contributed to a project aimed at building a solution for the Brazilian National Financial System.

Key Contributions

- Built the front-end of a web-based table editor similar to Microsoft Excel.
- Worked with ReactJS and Chakra UI to build the interface.
- Participated in agile ceremonies including planning, retrospective and daily meetings.
- Delivered solutions aligned with client needs and project deadlines.

Full Stack Developer

University of Brasilia | Project | Brasilia, DF | Brazil

June 2020 – December 2020

Worked on a mobile application created during the pandemic to connect volunteers and people in need.

Key Contributions

- Developed the mobile app with React Native.
- Built the back-end architecture and application features using Node.js and MongoDB.

EDUCATION

Bachelor of Software Engineering

University of Brasilia | 2017 – 2024

Front-end Program

Newtab Academy

CORE SKILLS

Front-end Development - Micro Frontend Architecture - Design Systems - Component Documentation - API Integration - Automated Testing - Code Quality - Performance - Cross-functional Collaboration - Agile Practices - Technical Refinement - Continuous Improvement

TOOLS & PLATFORMS

React, Vue.js, TypeScript, JavaScript, Tailwind CSS, Emotion Styled, Chakra UI, Module Federation, Storybook, Jest, Swagger, Docker, Nginx, Git, Node.js, MongoDB, React Native
